It is up to the end user or specifier to determine if the application of light commercial flooring is acceptable for the end use. If there are areas that will be exposed to heavy rolling loads or extreme foot traffic conditions, then it is recommended to use a Windmoeller flooring product approved for heavy commercial applications. Contact your Windmoeller Inc. representative prior to purchase and installation with any questions or concerns. Proper walk-off entry mats, chair mats and chair foot protectors are always required to protect your Windmoeller Inc. flooring from premature wear and damage, and to comply with the limited warranty.
